pyCGNS.PAT/Manual

Release 4.0.1

Marc Poinot

May 12, 2011

CONTENTS

The module to create and manipulate SIDS/Python trees. PAT has a *cgnslib* module with functions to create SIDS/Python compliant data structures. PAT defines all the CGNS types, names, enumerates or any other CGNS keyword.

SIDS PATTERNS

This module contains all the CGNS/SIDS structures using CGNS.PAT as API.

THE PYTHONISH CGNS LIB

The so-called *CGNS lib* or *MLL* or *Mid-level* library, is set of functions for used to read/write/modify a set of nodes matching a CGNS/SIDS type. The Pythonish flavour of this library declares a set of functions with more or less the same interface but with Python values.

UTILITIES

CGNS.PAT.cgnsutils.**getAllNodesByTypeList**(*typelist*, *tree*)
Returns a list of paths from the argument tree with nodes matching the list of types. See also
:func:getAllNodesByTypeSet

CGNS.PAT.cgnsutils.**getNodeFromPath**(*path*, *node*)
path : path to look for as a list of strings node : root node for the tree parse

CGNS.PAT.cgnsutils.**getValueByPath**(*node*, *path*)
node : Root node of the tree parse path : Path string of the target node

Gets the value of the CGNS/Python node with name 'path'. Returns None if the node is not found.

CGNS.PAT.cgnsutils.**hasFortranFlag**(*node*)
Returns False if the node value is a numpy array with Fortran flag OFF. Any other case leads to a True
return.

Args:

  • node: Node to check, value is second element in the node

Return:

  • False: Node value is a numpy array with C order

  • True: Any other case

CGNS.PAT.cgnsutils.**newNode**(*name*, *value*, *children*, *type*, *parent=None*)
Creates a new node with and bind it to its parent.

Args:

  • name: node name

  • value: node value

  • children: list of node children

  • type: CGNS type

  • parent: parent node where to insert the new node

Return:

  • The new node

Remark:

  • If parent is None (default) node is orphan

CGNS.PAT.cgnsutils.**sameNode**(*nodeA*, *nodeB*)
Compare two nodes.

Args:

  • nodeA: first node to compare to second one

- nodeB: second node to compare to first one

Return:

- False if there is any kind of diffence with node contents

Remarks:

- Comparison looks at contents values (name string, type string,...)

- There is no recursion in the children list

CGNS KEYWORDS

Instead of generating a new doc from a file, the file itself is included here. The purpose of *cgnskeywords.py* is to declare all constants as Python variables. This leads to several advantages:

- You cannot make a typo on a name. For example, if you use "ZoneGridConnectivity" as a plain string you may mistype it as "Zonegridconnectivity" or "ZoneGridConectivity" and this may silently produce a bad CGNS tree.

- You can handle enumerate as lists. For example you have lists for units: MassUnits_l, LengthUnits_l, AllDimensionalUnits_l, AllUnits_l

- You can identify what is a CGNS reserved or recommended name or not.

```python
# -----------------------------------------------------------------------------
# pyCGNS.PAT - Python package for CFD General Notation System - PATternMaker
# See license.txt file in the root directory of this Python module source
# -----------------------------------------------------------------------------
# $Release: v4.0.1 $
# -----------------------------------------------------------------------------

# -----------------------------------------------------------------------------
# TYPES, ENUMERATES, CONSTANTS, NAMES from CGNS/SIDS v2.5.3
#
# [1] A CGNS/SIDS string constant is postfixed with _s
# 'ZoneType' is ZoneType_s
#
# [2] A CGNS/SIDS string constant repersenting a type has _ts
# 'ZoneType_t' is ZoneType_ts
#
# [3] A list of possible values for a given type has _l
# ZoneType_l is [Structured_s,Unstructured_s,Null_s,UserDefined_s]
# which is same as ["Structured","Unstructured","Null","UserDefined"]
#
# [4] An enumerate mapping of a list of values is not prefixed
# ZoneType is {'Unstructured':3,'Null':0,'Structured':2,'UserDefined':1}
#
# [5] The reverse dictionnary of the previous one is postfixed with _
# ZoneType_ is {0:'Null',1:'UserDefined',2:'Structured',3:'Unstructured'}
#
# -----------------------------------------------------------------------------

  - *UserDefinedData_t* ({UserDefined})

5.38 GeometryEntity_t

- Name
  - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N

5.39 GeometryFile_t

- Name
  - GeometryFile
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.40 GeometryFormat_t

- Name
    - GeometryFormat
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.41 GeometryReference_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *GeometryFile_t* (GeometryFile)
    - *GeometryFormat_t* (GeometryFormat)
    - *GeometryEntity_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.42 GoverningEquations_t

- Name
    - GoverningEquations
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DiffusionModel_t* (DiffusionModel)
    - *UserDefinedData_t* ({UserDefined})

5.43 Gravity_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *DataArray_t* (GravityVector)
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *UserDefinedData_t* ({UserDefined})

5.44 GridConnectivity1to1_t

- Name
    - {UserDefined}
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *Transform_t"* (Transform)
    - *IndexRange_t* (PointRange)
    - *IndexRange_t* (PointRangeDonor)
    - *Ordinal_t* (Ordinal)
    - *GridConnectivityProperty_t* (GridConnectivityProperty)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.45 GridConnectivityProperty_t

- Name
    - GridConnectivityProperty
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes

– *Descriptor_t* ({UserDefined})

– *UserDefinedData_t* ({UserDefined})

– *Periodic_t* (Periodic)

– *AverageInterface_t* (AverageInterface)

5.46 GridConnectivityType_t

- Name
    - GridConnectivityType
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.47 GridConnectivity_t

- Name
    - {UserDefined}
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *GridLocation_t* (GridLocation)
    - *Ordinal_t* (Ordinal)
    - *Descriptor_t* ({UserDefined})
    - *IndexRange_t* (PointRange)
    - *IndexArray_t* (PointList)
    - *IndexArray_t* (PointListDonor)
    - *IndexArray_t* (CellListDonor)
    - *GridConnectivityProperty_t* (GridConnectivityProperty)
    - *GridConnectivityType_t* (GridConnectivityType)
    - *DataArray_t* (InterpolantsDonor)

5.48 GridCoordinates_t

- Name
    - GridCoordinates
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *DataArray_t* ({UserDefined})
    - *Rind_t* (Rind)
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.49 GridLocation_t

- Name
    - GridLocation
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.50 IndexArray_t

- Name
    - PointList
    - PointListDonor
    - CellListDonor
    - InwardNormalList
- Data-Type: I4 R4 R8
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.51 IndexRange_t

- Name
    - PointRange
    - PointRangeDonor
    - ElementRange
    - {UserDefined}
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.52 IntegralData_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.53 InwardNormalIndex_t

- Name
    - InwardNormalIndex
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.54 Ordinal_t

- Name
    - Ordinal
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.55 OversetHoles_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *IndexArray_t* (PointList)
    - *GridLocation_t* (GridLocation)
    - *IndexRange_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.56 Periodic_t

- Name
    - Periodic
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})
    - *DataArray_t* (RotationCenter)
    - *DataArray_t* (RotationAngle)
    - *DataArray_t* (Translation)

5.57 ReferenceState_t

- Name
    - ReferenceState
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *Descriptor_t* (ReferenceStateDescription)
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.58 RigidGridMotion_t

- Name
    - {UserDefined}
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})
    - *DataArray_t* ({UserDefined})

5.59 Rind_t

- Name
    - Rind
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.60 RotatingCoordinates_t

- Name
    - RotatingCoordinates
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *DataArray_t* (RotationCenter)
    - *DataArray_t* (RotationRateVector)
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.61 SimulationType_t

- Name
    - SimulationType
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.62 ThermalConductivityModel_t

- Name
    - ThermalConductivityModel
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.63 ThermalRelaxationModel_t

- Name
    - ThermalRelaxationModel
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.64 Transform_t"

- Name
    - Transform
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/One

5.65 TurbulenceClosure_t

- Name
    - TurbulenceClosure
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.66 TurbulenceModel_t

- Name
    - {UserDefined}
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DiffusionModel_t* (DiffusionModel)

5.67 UserDefinedData_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *GridLocation_t* (GridLocation)
    - *IndexRange_t* (PointRange)
    - *IndexArray_t* (PointList)
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *FamilyName_t* (FamilyName)
    - *UserDefinedData_t* ({UserDefined})
    - *Ordinal_t* (Ordinal)

5.68 ViscosityModel_t

- Name
    - ViscosityModel
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *DataArray_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.69 WallFunctionType_t

- Name
    - WallFunctionType
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.70 WallFunction_t

- Name
    - WallFunction
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})
    - *WallFunctionType_t* (WallFunctionType)

5.71 ZoneBC_t

- Name
    - ZoneBC
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *BC_t* ({UserDefined})
    - *ReferenceState_t* (ReferenceState)
    - *DataClass_t* (DataClass)
    - *DimensionalUnits_t* (DimensionalUnits)
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.72 ZoneGridConnectivity_t

- Name
    - ZoneGridConnectivity
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *GridConnectivity1to1_t* ({UserDefined})
    - *GridConnectivity_t* ({UserDefined})
    - *OversetHoles_t* ({UserDefined})
    - *Descriptor_t* ({UserDefined})
    - *UserDefinedData_t* ({UserDefined})

5.73 ZoneIterativeData_t

- Name
    - {UserDefined}
- Data-Type: M T
- Dimensions/DimensionValues
- Cardinality: Zero/One
- Child Nodes
    - *DataClass_t* (DataClass)

– *DimensionalUnits_t* (DimensionalUnits)

– *Descriptor_t* ({UserDefined})

– *UserDefinedData_t* ({UserDefined})

– *DataArray_t* ({UserDefined})

5.74 ZoneType_t

- Name
    - ZoneType
- Data-Type: C1
- Dimensions/DimensionValues
- Cardinality: One/One

5.75 Zone_t

- Name
    - {UserDefined}
- Data-Type: I4
- Dimensions/DimensionValues
- Cardinality: Zero/N
- Child Nodes
    - *GridCoordinates_t* (GridCoordinates)
    - *GridCoordinates_t* ({UserDefined})
    - *DiscreteData_t* ({UserDefined})
    - *Elements_t* ({UserDefined})
    - *ZoneBC_t* (ZoneBC)
    - *FlowSolution_t* ({UserDefined})
    - *ZoneType_t* (ZoneType)
    - *Ordinal_t* (Ordinal)
    - *ZoneGridConnectivity_t* (ZoneGridConnectivity)
    - *ZoneIterativeData_t* ({UserDefined})
    - *RigidGridMotion_t* ({UserDefined})
    - *ReferenceState_t* (ReferenceState)
    - *IntegralData_t* ({UserDefined})
    - *ArbitraryGridMotion_t* ({UserDefined})
    - *FamilyName_t* (FamilyName)
    - *FlowEquationSet_t* (FlowEquationSet)

– *ConvergenceHistory_t* (ZoneConvergenceHistory)

– *RotatingCoordinates_t* (RotatingCoordinates)

– *DataClass_t* (DataClass)

– *DimensionalUnits_t* (DimensionalUnits)

– *Descriptor_t* ({UserDefined})

– *UserDefinedData_t* ({UserDefined})
